AIR CONTROL S[®]

INSECTICIDE SPRAY

Pyrethrum based insecticide for use with dedicated automatic electronic diffusers, with a knockdown and repellent effect.

APPLICATIONS

Air Control S is suitable for pest control in domestic, civil and public premises (e.g. homes, living areas, toilets, meeting rooms, schools, community facilities, canteens, shops, laboratories, warehouses, food-processing industries, hotels, restaurants, bars, barracks, riding stables, stables, animal shelters, and means of transport such as ships, trains, buses and campers, etc. excluding aircraft).

The repellent effect of the pyrethrum extract may help prevent reinfestation of treated premises by insects.

TARGET ORGANISMS

Flies

Moths

Mosquitoes

COMPOSITION

Pyrethrum extract 2,1175%
equivalent to 1.75 g of pure pyrethrins
PBO 16%

FORMULATION

Aerosol

SIZE

250 ml

CODE

020

PACKAGING

48 Pz.

DIRECTIONS FOR USE

Insert the can into the automatic diffuser and activate it following the instructions provided in the packaging. For best results, position the electronic diffuser by mounting it on a wall or placing it on a piece of furniture at least 2 metres from the floor and 30 cm from the ceiling. **Air Control S** is released at regular programmable intervals ranging from **7,5 to 30 minutes** in very small quantities, ensuring continuous protection against insects.

A 250 ml can left in operation 24 hours a day with a 15-minute interval lasts up to 4 weeks. The system is designed for insect control in areas up to 45 m².

Air Control S can also be used manually: hold the can upright, press the actuator and spray upwards towards the centre of the room using short bursts. For a medium-sized room, do not exceed 5-6 seconds of spraying.

WARNINGS AND PRECAUTIONS FOR USE

Carefully read the instructions on the product label.
